LIFELONG RESEARCH OBJECTIVE

My lifelong research objective is to understand how language models come to understand and use human language, and to turn that understanding into language technologies that people can trust in their everyday lives.

RESEARCH INTERESTS

My research interests lie in large language models (LLMs) and natural language processing (NLP). I am interested in how LLMs understand and generate language, how their abilities and limitations can be evaluated reliably, and how they can be made more robust and useful in real-world settings, including Korean language applications.

EDUCATION

- **Soongsil University** Mar. 2024 - Feb. 2028 (Expected)
B.S. in Computer Science and Engineering (advisor: Chanjun Park)
Lab: <https://sites.google.com/view/ssu-nlp/home>

PUBLICATIONS

Equal contribution: *, Corresponding author: †
